

AGRICULTURE

Cascade attachments help cultivate an environment of productivity.

Lift truck attachments for all your agricultural needs.

***From seed to crop to market,
Cascade attachments can improve
the efficiency of your operation.***

Field tested products designed specifically with the agricultural industry in mind.

Utilize our extensive line of products for handling seed, hay bales, feed, fertilizer, dirt, livestock, produce, plants, or any number of products.

We offer attachments for both indoor and outdoor applications as well as those that operate in extreme temperatures, hot or cold. Featuring the best materials and innovative designs that stand the test of time, Cascade attachments are the smart choice.

Multiple Load Handlers

Use the same lift truck to handle either single or multiple loads. These highly versatile attachments allow you to achieve the productivity gains of multiple load handling without sacrificing the ability to handle single pallets.

Bin Dumpers

Designed to provide an efficient and economical means of handling and dumping bins. Can easily accommodate various bin heights by manually adjusting the top bin stops.

Layer Pickers

When building mixed load pallets, the Cascade Layer Picker handles single layers or multiple boxed products.

Rotators with Bin Hold Down

Add 360° revolving motion, in both directions, to truck forks. Used in agriculture and food processing for load inverting and dumping loads.

Produce Handlers

The Produce Handler dramatically reduces the number of trips that are needed to load a truck, allowing you to move more loads faster, minimize damage, be competitive and stay green.

Push/Pulls

Push/Pulls allow you to ship, receive and warehouse unit loads on inexpensive slip sheets rather than pallets. Using slip sheets eliminates the cost of pallet purchase, maintenance, disposal and storage while increasing cube utilization.

Whatever the application, we can handle it.

Magnetic Fork Covers - DAGS

Ideal for handling a wide variety of loads. Designed for use in any industrial sector where palletless products could be damaged from contact with bare forks. When confronted with an awkward load like metal boxes or cages, DAGS can be installed in a matter of seconds.

iForks Pro

These unique and innovative forks let you weigh your product as you lift it. The wireless display uses Bluetooth® technology enabling you to view and track the weight of individual loads and total weight of multiple loads.

Stationary Load Inverters

A reliable, economical and efficient means of inverting loads. Allows transfer of product to pallet or slipsheet, freezer spacer removal, damaged pallet exchange or damaged carton replacement. Also provides system for damaged product recovery from bottom of stack.
